Barile Consulting Services

Barile Consulting Services, LLC (BCS), established in 2005, specializes in ISO 9001, AS9100, ISO 13485 and ISO 14001 consulting for companies throughout the United States. ISO consulting has been completed for companies in Cleveland, Columbus, Cincinnati, Dayton, Atlanta, Chicago, Pittsburgh, Erie, Detroit, Jacksonville, Kansas City, Reno and many other areas throughout the country.

Today, ISO 9001 certifications have become standard for company suppliers as verification of internationally standardized qualification. An ISO 9001 certification enables companies to market themselves as ISO 9001 certified to attract new clientele, and qualifies companies to partake in project bidding.

Since starting the company back in 2005, BCS has implemented ISO 9001, ISO 13485, ISO 14001 and AS9100 for many companies in various industries within the United States. Every company consulted by BCS has passed their initial ISO certification audits as well as their surveillance (yearly) audits.

ISO Consulting Services

ISO 9001, ISO 13485, AS 9100 Consulting

- Become certified within 6 months or less
- GUARANTEED CERTIFICATION**

ISO 13485

ISO 13485 is based on the ISO 9001 format with additional requirements relating to design, special processes, environmental control, traceability, documentation records, and regulatory actions. The primary object of ISO 13485 is to standardize medical device regulatory requirements for quality management systems. As a result, it includes some particular requirements for medical devices but excludes some of the requirements of ISO 9001 that are not appropriate in a regulated environment.
